## Akron Brass Fire Hose Nozzles

HPMP Fire are delighted to bring you the full range of the Akron Brass Company's fire hose nozzles.

From straight stream to fog patterns, smooth bore to adjustable gallonage, many of Akron Brass' firefighting nozzles are unmatched in today's fire service for their operational flexibility, stream performance and flow control.

### Why Choose Akron?

- Are affordably priced
- Provides superior stream performance
- Provide raised lug marks straight stream for limited visibility operations
- Easy to maintain and train
- No recalibration required
- Are BS EN -15182 approved

### Whats New!

- Improved handle for operational flexibility with extra room for the gloved hand and hose
- Updated ergonomic pistol grip for great handling
- Snap on grips and handle colours to help identify pre-connects and better manage inventory
- Tough black nozzle body hard coat for expected performance and quality
- Etched smooth bore tips with pressure and flow indicators for easier training and operations
- Enhanced shutoff ball valve alignment when nozzle is open

*Akron Brass is a global manufacturer of fire fighting equipment and emergency response products.*

*Since its inception in 1918, Akron Brass has been an industry leader in handline nozzles, monitors and valves.*

*Akron Brass is backed by their parent company, IDEX, an American fluidics manufacturer, involved in the fire suppression industry which also includes the well known brand GODIVA.*
